REMARKS

25X1

1. During the period from 20 to 30 January 1952, no aircraft were located at Strausberg airfield. Although little activity could be observed in the airfield barracks installation, it appeared to be occupied to capacity.

25X1

2. According to a German employed at the field, a technical school for instruction on turbines was located there. He also stated that turbine instruction models were set up in the hangar and that security measures at the field were very strict. The sentries observed there appear to belong to a penal company. Air force officers and NCOs carrying suitcases arrived at the field. \*

25X1

- \* Comment. The information contained in the report appears credible. A central depot of the Twenty-Fourth Air Army is located in Strausberg. Since jet engines are being stored at this depot, the existence of a technical school appears plausible. No air unit is at present stationed at the field. The unit last observed there moved to Pochter in November 1951.
